436 Lafayette St, New York, NY 10003

Dear Slack:

  Hello, my name is Mohammed and I am a second-year student at City College of New York, pursuing a degree in Computer Science. I am qualified for this job because I have a strong work ethic and a desire to help fix things. I am a curious person who wants to know how things work. I also have a desire to improve my skills. I have strong communication skills, and I also have a positive attitude and empathy.

  You should hire me because I have a strong work ethic and I am always eager to help people. I am also a very curious person. When it comes to technology, I am always looking for the newest thing to learn about. I have a desire to improve my skills. For example, when I was taking a speech class I was not doing so well in that class, but as time progressed, I improved my communication skills. I also have a positive attitude toward everything. I try my best not to think negatively about anyone or anything.

  As you can see in my resume that I am a hard-working person and I also have some background in computer science. If I get the chance for an interview, it would be great. I am available Friday, Saturday and Sunday. You can contact me at mforkan000@citymqil.cuny.edu and thank you for your time. Looking forward to hearing from you.

Sincerely,

Md forkan
